

IN THE CLAIM

Please amend the claims 1 and 3 as the following. The claims 2, 4, 5 and 6 are remained without any amendment. All the amendments are based on the suggestion in the office action and thus no new matter is added.

LIST OF CLAIMS:

Claim 1. (Currently amended) A ratchet opener comprising:

a rod body; a lower end of the rod body being protruded with a non-round cylinder;

a handle having a receiving chamber;

a ratchet device having a seat; a center of the seat being installed with a first via hole; a top surface of the seat having two axial [axially] grooves; each groove being installed with a spring [an elastomer] and a ratchet block; an adjusting sheet placed [placing] above the seat; and a ratchet sheet being installed above the adjusting sheet;

wherein each ratchet block has a teathed inclined surface; the teathed [teeth] inclined surfaces of the two ratchet blocks are symmetrical to a center of the seal; the adjusting sheet has two through holes which are arranged corresponding to the two ratchet blocks [of] in the seat; a center of the adjusting sheet is installed with a second via hole; and the ratchet block is installed with a non-round buckling [bucking] hole corresponding to the cylinder at the lower end of the rod body;

wherein when the ratchet device is assembled, the rod body will pass through the buckling hole, [;] the first via hole and the second via hole and the seat is buckled to the receiving chamber of the handle.

Claim 2. (Original) The ratchet opener as claimed in claim 1, further

comprising a sleeve enclosing the ratchet device.

Claim 3. (Currently Amended) The ratchet opener as claimed in claim 1, wherein a lower end of the seat is formed with a protrusion portion; and the receiving chamber of the handle has buckling [bucking] slots for buckling the protrusion portion of the seat.

Claim 4. (Original) The ratchet opener as claimed in claim 1, wherein a C ring serves to fix the rod body to the ratchet device.

Claim 5. (Original) The ratchet opener as claimed in claim 1, wherein a top of the rod body is formed with a hole for installing an opener head.

Claim 6. (Original) The ratchet opener as claimed in claim 1, wherein the cylinder at the lower end of the rod body has a hexagonal shape.
